iGo Launches New Laptop Wall Charger - Slim

Power Solution With Sleek Design and Low Price Simplifies Device Charging

SCOTTSDALE, AZ, Sep 03, 2009 (MARKETWIRE via COMTEX) -- iGo, a leading provider of portable power solutions, unveiled their smallest and most affordable charger to date, the iGo(R) Laptop Wall Charger - Slim. Compatible with nearly every electronic device on the market, the new slim charger allows users to power up their laptop computers AND mobile devices with one charger at a great price. Available in stores and at www.iGo.com for \$79.99 MSRP, the new charger takes up minimal space while guaranteeing maximum results.

"While we have always offered portable power solutions to charge multiple devices simultaneously, this laptop charger is our most affordable and sleekly designed charger to date," said Michael D. Heil, president and chief executive officer of iGo. "This thin charger is the perfect entry level product for gadget lovers to try out iGo products and experience first hand the benefits of using one simple product for all their charging needs."

At only a half an inch thick, the nearly flat wall charger packs a lot of punch! The lightweight charger utilizes iGo's interchangeable power tips to charge multiple devices from one charger. Compatible with nearly every electronic device on the market, these tips allow gadget lovers to quickly charge their laptop plus an iPod(R), iPhone(R), BlackBerry(R), Bluetooth(R) headset, digital camera and/or gaming device by plugging the included USB cable into their laptop.

Just in time for the Labor Day holiday weekend, the new slim laptop charger makes packing for a trip easy. Instead of one charger for each and every device, travelers only need to bring the space-saving laptop charger to power their devices. The iGo Laptop Wall Charger - Slim also works worldwide eliminating the need for a voltage converter.
